Focus on Education....

*"Building a Better Future
Through Innovative
Educational Design"*

Nelson Architectural Group, Inc.
Knowledge ▪ Experience ▪ Leadership ▪ Creativity

From the development of design to construction inspection and executing contracts, our team provides constant hands-on supervision of all vital tasks.

About Us

The Nelson Architectural Group, Inc. has provided architectural services on over 700 building projects throughout Arkansas, Louisiana and Texas. We have more than 35 years of experience in the design of educational, government, housing, medical and commercial facilities providing services to a diverse group of clients.

Knowledge, Experience, Leadership and Creativity:

The Nelson Architectural Group is committed to providing innovative design solutions for complex projects that result from a highly investigative design process. We help our clients turn their visions into affordable, buildable solutions through knowledge, experience, leadership and creativity.

Educational Dynamics

Understanding the dynamics of public and private education facilities and their funding is a must for an educational designer. The Nelson Architectural Group has participated in a variety of educational projects funded through bond issues, state partnership grants and private fund raising efforts.

Our experience in educational projects and financing methods, from entire new campuses to existing renovations, gives us a firm foundation on which to build facilities that inspire student learning as well as meet state standards and guidelines.

Our Education Experience

Since 1976, the Nelson Architectural Group has been involved in the planning of over 40 public education projects, including 4 new campuses, numerous classroom buildings, computer labs, science labs and athletic facilities, as well as hundreds of higher educational projects of all types.

This experience includes working with numerous government and financing entities including the State of Arkansas, U.S. Department of Education Title III, USDA, ARRA among others, in conjunction with public school

districts, private schools, universities and a variety of non-profit entities.

We maintain a good working relationship with the Arkansas Department of Education, Division of Public Schools Academic Facilities and Transportation. We are well versed in the requirements and standards for new school facilities as well as renovations for elementary, middle school, junior high and high school campuses.

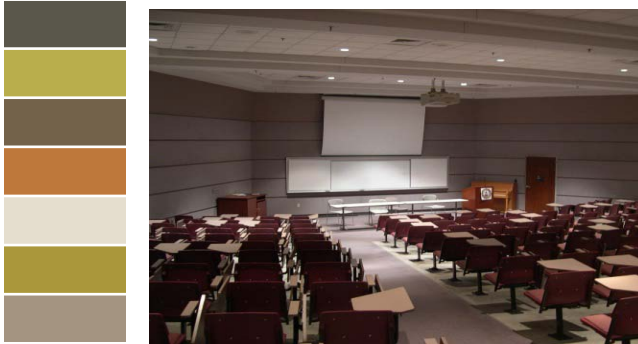

Creativity in Design

Our projects are recognized for their attention to amenities and design detail that enhance learning while meeting project budgets.

"Our projects are recognized for their attention to amenities and design detail"

A careful balance of cost efficient design, up-to-date technology, listening to student and teacher's needs, and providing exceptional functionality make our educational projects

very desirable and maintainable facilities. Most importantly, our primary design objective is to have a positive impact on students, faculty, staff and the communities in which they live.

Educational Trends for 2012

Now that the American Recovery and Reinvestment Act funds have been expended, many public schools in Arkansas are turning to bond issues, second lien bonds and Arkansas state partnership grants to fund new campus construction and facility replacement.

Our Education Clients:

The Nelson Architectural Group works with public school districts, private schools and non-profit entities to provide educational design services for new campuses, classroom buildings, renovations, athletic facilities and facility assessments. Some of our past clients include: Dollarway School District, Watson Chapel School District, St. Joseph Catholic School, Pine Bluff School District and Jenkins Memorial Center.
